EDUCATION

MAE FAH LUANG UNIVERSITY

- School of Applied Digital Technology
- Major in Software Engineering.

Expected Graduation: 2026

SKILLS

Programming Languages

- Golang
- Typescript
- Dart
- Java
- Python
- C#

Frontend Frameworks

- React
- React Native
- NextJS
- Vue
- Flutter
- Angular

Backend Frameworks

- Echo
- Express
- Spring Boot
- Nest

Database

- MySQL
- Firebase
- PostgreSQL
- SQLite
- MongoDB

Infrastructure & Tools

- Terraform
- Kubernetes
- Docker

LANGUAGES

- Thai (Native)
- English (Basics)

PROFILE

I'm a third-year Software Engineering student at Mae Fah Luang University, focusing on full-stack development and learning cyber security

WORK EXPERIENCE

How to Live and Learn on Campus 2024

Frontend Developer

- UI/UX Design & Development: Led the design and development of user interfaces using Vue.js and TypeScript, ensuring a seamless and responsive design.
- Feature Integration: Worked on features like navigation, form handling, and real-time updates, enhancing user interaction and overall functionality.
- Performance Optimization: Focused on optimizing frontend performance for faster load times and smooth user experiences.
- Collaboration: Collaborated with backend teams to ensure smooth API integration and data flow within the platform.

PROJECT EXPERIENCE

Yakkaw Mobile Application

3RD - YEAR / 2024

FullStack Developer

Key Contributions:

github.com/6531503042/Deap-Mobile-Application

- Contributed to building the mobile app's user interface with a focus on usability and smooth user experience.
- Developed key features such as real-time updates, and notifications, improving overall app functionality.

Stack: • React Native • MySQL

Sport Complex Management

3RD - YEAR / 2024

Tester & FullStack Developer

Key Contributions:

github.com/6531503042/Sport-Complex

- Payment System Integration
- Payment Page Development
- Payment Route Management

Stack: • Echo (Golang) • gRPC API • MongoDB • NextJS (Typescript)

Deap Appointment Application

2nd - Year / 2023

FullStack Developer

Key Contributions:

github.com/6531503042/Deap-Mobile-Application

- Led the design and implementation of various UI components, including the onboarding screen, homepage updates, and doctor-related pages.
- Implemented Functionalities: Integrated dark mode, language support, and a notification system to improve user experience.

Stack: • Flutter (Dart) • Firebase
